Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation)

Kai Zuber

Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) Kai Zuber

Neutrino physics remains one of the most exciting fields of fundamental physics today. The neutrino's position at the intersection of particle physics, astrophysics, and nuclear physics ensures continuing interest in the subject. Major activities at accelerators like Fermilab, KEK and CERN, in addition to underground facilities like Gran Sasso, Kamioka and Sudbury, continue to enhance our understanding of the origins and properties of neutrinos, and their implications for the Standard Model and cosmology.

Neutrino Physics provides an up to date and comprehensive introduction to the subject as well as an invaluable resource for researchers in physics and astrophysics. Starting with a brief historical overview the author proceeds to review fundamental neutrino properties, the neutrino mass question, and their place within and beyond the Standard Model. The final chapters examine the role of neutrinos in modern astroparticle physics, cosmology and the dark matter problem. The book concludes with a summary of the current status of neutrino physics and the implications of recent results.

Written to be accessible to readers from different backgrounds in nuclear, particle or astrophysics and with a detailed reference list, this title will be essential for any researcher or advanced student who needs to understand modern neutrino physics.

From reader reviews:

Corey Gardner:

Book is written, printed, or created for everything. You can realize everything you want by a publication. Book has a different type. To be sure that book is important factor to bring us around the world. Beside that you can your reading expertise was fluently. A e-book Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) will make you to end up being smarter. You can feel a lot more confidence if you can know about everything. But some of you think which open or reading some sort of book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you seeking best book or acceptable book with you?

Danielle Smith:

Information is provisions for anyone to get better life, information nowadays can get by anyone on everywhere. The information can be a information or any news even a huge concern. What people must be consider whenever those information which is from the former life are challenging to be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you have the unstable resource then you get it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) as the daily resource information.

Paul Queen:

The reserve with title Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) has a lot of information that you can find out it. You can get a lot of help after read this book. This book exist new knowledge the information that exist in this reserve represented the condition of the world today. That is important to you to find out how the improvement of the world. This kind of book will bring you within new era of the globalization. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Joseph Mesta:

Your reading sixth sense will not betray a person, why because this Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) guide written by well-known writer who knows well how to make book which can be understand by anyone who have read the book. Written in good manner for you, still dripping wet every ideas and producing skill only for eliminate your personal hunger then you still question Neutrino Physics (Series in High Energy Physics, Cosmology and Gravitation) as good book but not only by the cover but also through the content. This is one reserve that can break don't evaluate book by its protect, so do you still needing an additional sixth sense to pick this specific! Oh come on your looking at sixth sense already said so why you have to listening to one more sixth sense.
