**Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series)** Marcelo Bertalmío

**Image Processing for Cinema** presents a detailed overview of image processing techniques that are used in practice in digital cinema. The book shows how image processing has become ubiquitous in movie-making, from shooting to exhibition. It covers all the ways in which image processing algorithms are used to enhance, restore, adapt, and convert moving images. These techniques and algorithms make the images look as good as possible while exploiting the capabilities of cameras, projectors, and displays.

The author focuses on the ideas behind the methods, rather than proofs and derivations. The first part of the text presents fundamentals on optics and color. The second part explains how cameras work and details all the image processing algorithms that are applied in-camera. With an emphasis on state-of-the-art methods that are actually used in practice, the last part describes image processing algorithms that are applied offline to solve a variety of problems.

The book is designed for advanced undergraduate and graduate students in applied mathematics, image processing, computer science, and related fields. It is also suitable for academic researchers and professionals in the movie industry.

### **From reader reviews:**

#### **Victor Shepard:**

In other case, little people like to read book Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series). You can choose the best book if you love reading a book. Given that we know about how is important any book Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series). You can add know-how and of course you can around the world by a book. Absolutely right, because from book you can learn everything! From your country until finally foreign or abroad you can be known. About simple matter until wonderful thing you are able to know that. In this era, we are able to open a book as well as searching by internet product. It is called e-book. You need to use it when you feel fed up to go to the library. Let's go through.

#### **Rosalyn Kendall:**

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their sparetime with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Will you something different to fill your own free time/ holiday? Can be reading a book can be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to try look for book, may be the publication untitled Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series) can be fine book to read. May be it may be best activity to you.

#### **John Thornton:**

This Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series) is great reserve for you because the content and that is full of information for you who always deal with world and still have to make decision every minute. This book reveal it details accurately using great plan word or we can claim no rambling sentences in it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but hard core information with lovely delivering sentences. Having Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series) in your hand like getting the world in your arm, information in it is not ridiculous just one. We can say that no e-book that offer you world throughout ten or fifteen tiny right but this guide already do that. So , this really is good reading book. Heya Mr. and Mrs. busy do you still doubt that?

#### **Jo Jordan:**

In this age globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspapers, book, and

soon. You can view that now, a lot of publisher this print many kinds of book. Often the book that recommended to you personally is Image Processing for Cinema (Chapman & Hall/CRC Mathematical and Computational Imaging Sciences Series) this e-book consist a lot of the information from the condition of this world now. This book was represented so why is the world has grown up. The language styles that writer use to explain it is easy to understand. The writer made some research when he makes this book. This is why this book appropriate all of you.
