A First Course in Computational Physics

Paul L. DeVries, Javier E. Hasbun

A First Course in Computational Physics Paul L. DeVries, Javier E. Hasbun

Computers and computation are extremely important components of physics and should be integral parts of a physicist's education. Furthermore, computational physics is reshaping the way calculations are made in all areas of physics. Intended for the physics and engineering students who have completed the introductory physics course, *A First Course in Computational Physics, Second Edition* covers the different types of computational problems using MATLAB with exercises developed around problems of physical interest. Topics such as root finding, Newton-Cotes integration, and ordinary differential equations are included and presented in the context of physics problems. A few topics rarely seen at this level such as computerized tomography, are also included. Within each chapter, the student is led from relatively elementary problems and simple numerical approaches through derivations of more complex and sophisticated methods, often culminating in the solution to problems of significant difficulty. The goal is to demonstrate how numerical methods are used to solve the problems that physicists face. Read the review published in *Computing in Science & Engineering* magazine, March/April 2011 (Vol. 13, No. 2) © 2011 IEEE, Published by the IEEE Computer Society

From reader reviews:

Paul Hinojosa:

The book A First Course in Computational Physics give you a sense of feeling enjoy for your spare time. You may use to make your capable considerably more increase. Book can to get your best friend when you getting pressure or having big problem together with your subject. If you can make looking at a book A First Course in Computational Physics to get your habit, you can get considerably more advantages, like add your personal capable, increase your knowledge about some or all subjects. You may know everything if you like start and read a publication A First Course in Computational Physics. Kinds of book are a lot of. It means that, science e-book or encyclopedia or other individuals. So , how do you think about this guide?

Richard Forbes:

The publication with title A First Course in Computational Physics contains a lot of information that you can discover it. You can get a lot of profit after read this book. This book exist new knowledge the information that exist in this publication represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This book will bring you inside new era of the glowbal growth. You can read the e-book with your smart phone, so you can read it anywhere you want.

Nicholas Poston:

Can you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Aim to pick one book that you just dont know the inside because don't assess book by its protect may doesn't work is difficult job because you are afraid that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer may be A First Course in Computational Physics why because the excellent cover that make you consider with regards to the content will not disappoint anyone. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly make suggestions to pick up this book.

Elaine Sitz:

Many people spending their time frame by playing outside using friends, fun activity along with family or just watching TV all day long. You can have new activity to enjoy your whole day by reading through a book. Ugh, ya think reading a book can actually hard because you have to use the book everywhere? It okay you can have the e-book, getting everywhere you want in your Touch screen phone. Like A First Course in Computational Physics which is obtaining the e-book version. So , why not try out this book? Let's observe.
