Fuel Cell Science: Theory, Fundamentals, and Biocatalysis

Fuel Cell Science: Theory, Fundamentals, and Biocatalysis

A comprehensive survey of theoretical and experimental concepts in fuel cell chemistry

Fuel cell science is undergoing significant development, thanks, in part, to a spectacular evolution of the electrocatalysis concepts, and both new theoretical and experimental methods. Responding to the need for a definitive guide to the field, Fuel Cell Science provides an up-to-date, comprehensive compendium of both theoretical and experimental aspects of the field.

Designed to inspire scientists to think about the future of fuel cell technology, Fuel Cell Science addresses the emerging field of bio-electrocatalysis and the theory of heterogeneous reactions in fuel cell science and proposes potential applications for electrochemical energy production. The book is thorough in its coverage of the electron transfer process and structure of the electric double layer, as well as the development of operando measurements. Among other subjects, chapters describe:

- Recently developed strategies for the design, preparation, and characterization of catalytic materials for fuel cell electrodes, especially for new fuel cell cathodes
- A wide spectrum of theoretical and computational methods, with the aim of developing new fuel cell catalysis concepts and improving existing designs to increase their performance.

Edited by two leading faculty, the book:

- Addresses the emerging fields of bio-electrocatalysis for fuel cells and theory of heterogeneous reactions for use in fuel cell catalysis
- Provides a survey of experimental and theoretical concepts in these new fields
- Shows the evolution of electrocatalysis concepts
- Describes the chemical physics of fuel cell reactions
- Forecasts future developments in electrochemical energy production and conversion

Written for electrochemists and electrochemistry graduate students, electrocatalysis researchers, surface and physical chemists, chemical engineers, automotive engineers, and fuel cell and energy-related researchers, this modern compendium can help today's best minds meet the challenges in fuel science technology.

From reader reviews:

Ryan Donahue:

Hey guys, do you would like to finds a new book to read? May be the book with the concept Fuel Cell Science: Theory, Fundamentals, and Biocatalysis suitable to you? The book was written by well-known writer in this era. The particular book untitled Fuel Cell Science: Theory, Fundamentals, and Biocatalysis is the main of several books that will everyone read now. That book was inspired a number of people in the world. When you read this publication you will enter the new dimensions that you ever know ahead of. The author explained their strategy in the simple way, and so all of people can easily to comprehend the core of this publication. This book will give you a wide range of information about this world now. So you can see the represented of the world with this book.

Frederick Avelar:

You could spend your free time to study this book this guide. This Fuel Cell Science: Theory, Fundamentals, and Biocatalysis is simple to deliver you can read it in the park, in the beach, train as well as soon. If you did not have much space to bring often the printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

John Wilson:

A lot of book has printed but it is unique. You can get it by world wide web on social media. You can choose the most effective book for you, science, comic, novel, or whatever through searching from it. It is identified as of book Fuel Cell Science: Theory, Fundamentals, and Biocatalysis. You can add your knowledge by it. Without leaving the printed book, it might add your knowledge and make you happier to read. It is most critical that, you must aware about guide. It can bring you from one destination for a other place.

James Fitzpatrick:

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person just like reading or as reading through become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to include you knowledge, except your own teacher or lecturer. You will find good news or update with regards to something by book. Numerous books that can you take to be your object. One of them is actually Fuel Cell Science: Theory, Fundamentals, and Biocatalysis.
