## **The Physics of Modern Brachytherapy for Oncology (Series in Medical Physics and Biomedical Engineering)** Dimos Baltas, Loukas Sakelliou, Nikolaos Zamboglou

Brachytherapy has become the modality of choice for several cancer localizations, minimizing the possibility of unacceptable risks for healthy tissues and providing a more cost-effective and convenient treatment for patients. Written by leading experts in the physics, development, and implementation of brachytherapy, *The Physics of Modern Brachytherapy for Oncology* discusses the subject in detail, covering its definition, the basic physics of radiation interaction with matter, radionuclides, sources and source production, calibration and dosimetry protocols as well as experimental dosimetry methods appropriate for practical use.

Logically organized, the book begins with basic information, including quantities and units, followed by fundamental atomic and nuclear physics. It also provides the historical background of brachytherapy physics. The next several chapters discuss the radionuclides used in brachytherapy, reflecting upon past (radium), present (iridium or cobalt), and future (ytterbium) methods. The book proceeds to examine source calibration and dosimetry protocols for dose rate calculation while the final chapters explore more recent processes, including Monte Carlo-aided, experimental, and gel dosimetry. The appendices provide useful tables of isotopes, unit conversions and physical constants, brachytherapy sources, TG-43 and TG-43 U1 data tables, and dose rate tables.

Detailing the physics behind brachytherapy treatment, *The Physics of Modern Brachytherapy for Oncology* is essential reading for researchers, practicing radiation oncologists, and medical physicists who want to keep abreast of the developments in this changing field as well as for postgraduate students in medical physics.

**From reader reviews:**

**Heather Jones:**

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each reserve has different aim as well as goal; it means that e-book has different type. Some people feel enjoy to spend their a chance to read a book. They are reading whatever they acquire because their hobby is reading a book. How about the person who don't like reading a book? Sometime, man feel need book after they found difficult problem or perhaps exercise. Well, probably you will require this The Physics of Modern Brachytherapy for Oncology (Series in Medical Physics and Biomedical Engineering).

**Sylvia Langley:**

Your reading 6th sense will not betray you actually, why because this The Physics of Modern Brachytherapy for Oncology (Series in Medical Physics and Biomedical Engineering) e-book written by well-known writer we are excited for well how to make book which can be understand by anyone who read the book. Written within good manner for you, still dripping wet every ideas and creating skill only for eliminate your personal hunger then you still uncertainty The Physics of Modern Brachytherapy for Oncology (Series in Medical Physics and Biomedical Engineering) as good book but not only by the cover but also with the content. This is one guide that can break don't assess book by its include, so do you still needing another sixth sense to pick this!? Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.

**Carlos Mendoza:**

The book untitled The Physics of Modern Brachytherapy for Oncology (Series in Medical Physics and Biomedical Engineering) contain a lot of information on this. The writer explains the woman idea with easy way. The language is very simple to implement all the people, so do not really worry, you can easy to read this. The book was authored by famous author. The author brings you in the new period of literary works. It is possible to read this book because you can read more your smart phone, or product, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can open their official web-site along with order it. Have a nice study.

**Leticia Bennet:**

What is your hobby? Have you heard which question when you got students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And you also know that little person including reading or as reading become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You will find good news or update regarding something by book. Amount types of books that can you take to be your object. One of them is The Physics of Modern Brachytherapy for

Oncology (Series in Medical Physics and Biomedical Engineering).
