Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) Ching-Lai Hwang, Kwangsun Yoon

This monograph is intended for an advanced undergraduate or graduate course as well as for the researchers who want a compilation of developments in this rapidly growing field of operations research. This is a sequel to our previous work entitled "Multiple Objective Decision Making--Methods and Applications: A State-of-the-Art Survey," (No. 164 of the Lecture Notes). The literature on methods and applications of Multiple Attribute Decision Making (MADM) has been reviewed and classified systematically. This study provides readers with a capsule look into the existing methods, their characteristics, and applicability to analysis of MADM problems. The basic MADM concepts are defined and a standard notation is introduced in Part I. Also introduced are foundations such as models for MADM, transformation of attributes, fuzzy decision rules, and methods for assessing weight. A system of classifying seventeen major MADM methods is presented. These methods have been proposed by researchers in diversified disciplines; half of them are classical ones, but the other half have appeared recently. The basic concept, the computational procedure, and the characteristics of each of these methods are presented concisely in Part II. The computational procedure of each method is illustrated by solving a simple numerical example. Part IV of the survey deals with the applications of these MADM methods.

From reader reviews:

Mary Case:

What do you with regards to book? It is not important to you? Or just adding material if you want something to explain what your own problem? How about your time? Or are you busy person? If you don't have spare time to perform others business, it is make you feel bored faster. And you have free time? What did you do? Every person has many questions above. They have to answer that question mainly because just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) to read.

Jorge Raines:

Spent a free time for you to be fun activity to complete! A lot of people spent their leisure time with their family, or their particular friends. Usually they undertaking activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Will you something different to fill your free time/ holiday? Could possibly be reading a book is usually option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to test look for book, may be the guide untitled Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) can be very good book to read. May be it may be best activity to you.

Irene Weinstein:

Reading a book for being new life style in this season; every people loves to learn a book. When you go through a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your study, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this sort of us novel, comics, along with soon. The Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) provide you with new experience in reading through a book.

Christina Vallejo:

You can spend your free time to study this book this publication. This Multiple Attribute Decision Making: Methods and Applications A State-of-the-Art Survey (Lecture Notes in Economics and Mathematical Systems) is simple to create you can read it in the area, in the beach, train and soon. If you did not possess much space to bring often the printed book, you can buy often the e-book. It is make you easier to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when you buy

this book.
