Engineering Electromagnetics

Nathan Ida

Engineering Electromagnetics Nathan Ida

This text not only provides students with a good theoretical understanding of electromagnetic field equations but it also treats a large number of applications. No topic is presented unless it is directly applicable to engineering design or unless it is needed for the understanding of another topic. Included in this new edition are more than 400 examples and exercises, exercising every topic in the book. Also to be found are 600 end-of-chapter problems, many of them applications or simplified applications. A new chapter introducing numerical methods into the electromagnetic curriculum discusses the finite element, finite difference and moment methods.

From reader reviews:

Alberta Smith:

In this 21st millennium, people become competitive in most way. By being competitive today, people have do something to make these people survives, being in the middle of the actual crowded place and notice by surrounding. One thing that sometimes many people have underestimated it for a while is reading. That's why, by reading a e-book your ability to survive increase then having chance to remain than other is high. In your case who want to start reading a new book, we give you this Engineering Electromagnetics book as basic and daily reading publication. Why, because this book is more than just a book.

Joanne Hall:

Nowadays reading books be than want or need but also become a life style. This reading addiction give you lot of advantages. The advantages you got of course the knowledge even the information inside the book that improve your knowledge and information. The info you get based on what kind of book you read, if you want have more knowledge just go with training books but if you want experience happy read one using theme for entertaining for example comic or novel. The particular Engineering Electromagnetics is kind of reserve which is giving the reader unpredictable experience.

Jennifer Newhouse:

In this age globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The book that recommended for your requirements is Engineering Electromagnetics this reserve consist a lot of the information with the condition of this world now. This particular book was represented so why is the world has grown up. The dialect styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. Honestly, that is why this book acceptable all of you.

Nancy Thornton:

What is your hobby? Have you heard that will question when you got students? We believe that that issue was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. So you know that little person similar to reading or as studying become their hobby. You need to understand that reading is very important as well as book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update about something by book. Many kinds of books that can you choose to use be your object. One of them is actually Engineering Electromagnetics.
