C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning)

J. Ross Quinlan

C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) J. Ross Quinlan

Classifier systems play a major role in machine learning and knowledge-based systems, and Ross Quinlan's work on ID3 and C4.5 is widely acknowledged to have made some of the most significant contributions to their development. This book is a complete guide to the C4.5 system as implemented in C for the UNIX environment. It contains a comprehensive guide to the system's use, the source code (about 8,800 lines), and implementation notes. The source code and sample datasets are also available for download (see below).

C4.5 starts with large sets of cases belonging to known classes. The cases, described by any mixture of nominal and numeric properties, are scrutinized for patterns that allow the classes to be reliably discriminated. These patterns are then expressed as models, in the form of decision trees or sets of if-then rules, that can be used to classify new cases, with emphasis on making the models understandable as well as accurate. The system has been applied successfully to tasks involving tens of thousands of cases described by hundreds of properties. The book starts from simple core learning methods and shows how they can be elaborated and extended to deal with typical problems such as missing data and over fitting. Advantages and disadvantages of the C4.5 approach are discussed and illustrated with several case studies.

This book and software should be of interest to developers of classification-based intelligent systems and to students in machine learning and expert systems courses.

From reader reviews:

Cheryl Dawkins:

The book C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) give you a sense of feeling enjoy for your spare time. You can utilize to make your capable much more increase. Book can to be your best friend when you getting pressure or having big problem with your subject. If you can make reading a book C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) being your habit, you can get far more advantages, like add your own capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like open up and read a guide C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning). Kinds of book are a lot of. It means that, science reserve or encyclopedia or other people. So , how do you think about this book?

Stephen Hawkins:

Do you certainly one of people who can't read enjoyable if the sentence chained from the straightway, hold on guys this aren't like that. This C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) book is readable by you who hate the straight word style. You will find the info here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to offer to you. The writer associated with C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) content conveys thinking easily to understand by many people. The printed and e-book are not different in the articles but it just different available as it. So , do you nevertheless thinking C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) is not loveable to be your top listing reading book?

Charlotte Cooper:

Information is provisions for people to get better life, information today can get by anyone with everywhere. The information can be a know-how or any news even restricted. What people must be consider whenever those information which is from the former life are difficult to be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you have the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen in you if you take C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) as the daily resource information.

Chad Steinberger:

As a student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's soul or real their leisure activity. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that studying is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that

on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) can make you sense more interested to read.
