Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training Jon Kieffer, Yongchao Fan

This short book is an entry-level introduction to Carrier Ethernet, intended for anyone new to Carrier Ethernet, including those with little or no background in computer networking and/or telecommunications. It was conceived to be a companion to Fujitsu's *MEF-CECP 2.0 Exam Study Guide for Carrier Ethernet 2.0 Professionals*, but can be used alone (as an introduction to Carrier Ethernet) or in combination with other Carrier Ethernet training materials. The book has two aims: to explain networking technology leading up to and motivating Carrier Ethernet, and to explain Carrier Ethernet conceptually within this framework.

Carrier Ethernet emerges in the overlap between two highly evolved realms of networking technology: enterprise computer networking, and telecommunications networking. At one time these realms were very distinct, but for some years now they have been evolving toward convergence. Many professionals interested in Carrier Ethernet lack fundamental knowledge in one or both realms, as well as a clear framework for understanding their convergence and Carrier Ethernet's place in the evolution. Training resources for Carrier Ethernet professional certification tend to assume significant background knowledge and focus on mastering the details needed to pass an exam over core fundamentals and motivations. This book is designed to complement such material, focusing instead on explaining the big picture, the core background technologies, the context, the motivations, and the concepts that underpin Carrier Ethernet.

The book begins by explaining Ethernet in local area networking, starting from first principles and simple contexts and gradually building up to include MAC bridging and VLAN bridging. It then describes traditional telecommunications technology and wide area networking solutions prior to Carrier Ethernet. The book concludes with a high-level overview of Carrier Ethernet.

From reader reviews:

Susan Tokarz:

Hey guys, do you would like to finds a new book to see? May be the book with the headline Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training suitable to you? Often the book was written by famous writer in this era. Typically the book untitled Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training is the main of several books that everyone read now. This particular book was inspired lots of people in the world. When you read this book you will enter the new age that you ever know previous to. The author explained their idea in the simple way, thus all of people can easily to understand the core of this book. This book will give you a great deal of information about this world now. To help you to see the represented of the world within this book.

Pat Billings:

The book untitled Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training contain a lot of information on it. The writer explains your girlfriend idea with easy method. The language is very easy to understand all the people, so do certainly not worry, you can easy to read the item. The book was authored by famous author. The author gives you in the new age of literary works. You can easily read this book because you can please read on your smart phone, or model, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and order it. Have a nice read.

Donald Lombard:

In this particular era which is the greater individual or who has ability to do something more are more precious than other. Do you want to become one of it? It is just simple way to have that. What you must do is just spending your time almost no but quite enough to get a look at some books. Among the books in the top collection in your reading list is definitely Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training. This book and that is qualified as The Hungry Hills can get you closer in becoming precious person. By looking upward and review this book you can get many advantages.

Virginia Johnson:

What is your hobby? Have you heard that question when you got college students? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person like reading or as studying become their hobby. You must know that reading is very important and book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You get good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is niagra Introduction to Carrier Ethernet: A Foundation for MEF-CECP 2.0 Training.
