This book bridges the gap between investor psychology and quantitative risk management with a revolutionary risk management program that virtually any trader or investor can easily adapt to their goals and personalities. Using numerous fascinating real-life case studies, Dr. Kiev illustrates the various psychological and emotional traps to which even the savviest investors can fall victim. He develops a dynamic new risk management model that combines quantitative models and money management techniques. He also provides rigorous guidelines that will help readers answer such crucial questions as: How much should I trade? How much risk can I handle? and When should I get out?
