Memory in the Ontopoiesis of Life: Book Two. Memory in the Orbit of the Human Creative Existence (Analecta Husserliana) (Volume 102)

Memory in the Ontopoiesis of Life: Book Two. Memory in the Orbit of the Human Creative Existence (Analecta Husserliana) (Volume 102)

An individual has the potentiality to develop himself/herself during each period of his/her life. This potential for development can be affected by many different factors. These factors are divided into two main areas as internal factors and external factors. The common assumption is that internal factors are more effective than external factors. This is the dilemma about learning which process of lifelong learning is related to self-actualization. In this paper, discussion is limited to concept of lifelong learning and self actualization.

LIFELONG LEARNING An individual can take proper support from many components such as family, education system, media and peers. However, they may not provide proper support for the individual. Thus, the individual needs more pedagogical support to solve problems of life, develop his/her skills and capabilities. The pedagogical support should be given by educational system. Teaching and learning in some areas such as math, science, drawing, social studies and so on were defined as pedagogical support in the past. But, this approach is weakening in today. During teaching and learning processes teacher and learner should focus on the learning rather than the teaching. The concept of learning is likely to be argued in many dimensions. The concepts of teaching and learning tend to be redefined based on the latest changes.
